GUILHERME SPICACCI LIMA

Junior Software Developer | C#/.NET | PHP/Laravel | REST APIs | SQL

São Paulo, Brazil

(11) 99199-3229 • gui.spicacci.dev@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Software developer with hands-on experience in web development, system maintenance, integrations, and technical support in corporate environments. Worked for 1 year and 3 months as a freelance developer, delivering client solutions including a WooCommerce-integrated point-of-sale system that was commercialized and deployed in a real-world environment. Experience includes C#/.NET, PHP/Laravel, REST APIs, SQL, React, Next.js, Python, and automation. Currently at TOTVS, investigating incidents in the Protheus ERP, reproducing scenarios, analyzing ADVPL code, SQL queries, and business rules. Seeking a software development role, especially in backend development and application improvement.

PROFESSIONAL EXPERIENCE

TOTVS — Technical Support Analyst | Oct 2025 – Present | São Paulo, Brazil

• Provide technical support for Protheus ERP modules, including Fixed Assets, Accounting, PCO, SIGAEIC, and SIGAEEC.

• Investigate and diagnose incidents, reproduce scenarios, and run tests in Protheus environments.

• Analyze ADVPL source code, ExecAuto, and entry points used in customizations and integrations.

• Investigate issues involving code, system configuration, business rules, and environment; use SQL Server and SQL queries.

• Communicate technical findings and guidance to customers through issue resolution.

Freelance — Software Developer | Aug 2024 – Oct 2025

• Developed, deployed, maintained, and improved software solutions for clients.

• Built a PHP, Laravel, and MySQL point-of-sale system integrated with WooCommerce, later commercialized and deployed in a real-world environment.

• Developed and deployed e-commerce websites using WordPress and WooCommerce.

• Integrated external APIs and services; diagnosed and resolved production issues.

São Paulo Municipal Department of Management — Web Development Intern | Dec 2023 – Aug 2024 | São Paulo, Brazil

• Automated printer installation using Python and PowerShell to reduce manual configuration steps.

• Developed tools to generate and manage printer/driver data using JSON, including CRUD operations and duplicate prevention.

• Structured the installation workflow around previously registered printers and drivers.

PROJECTS

Jartisan CLI C# · .NET 10 · Native AOT · Maven · XML · Clean Architecture GitHub

- CLI tool for managing and automating Java/Maven projects.
- Manages pom.xml dependencies, generates Java scaffolding, and inspects Maven project structure.
- Organized into Domain, Application, Infrastructure, and CLI layers, using interfaces for decoupling; distributed with .NET Native AOT.

Enrollment Manager C# · ASP.NET Core · EF Core · PostgreSQL · Docker GitHub

- REST API for managing enrollments, courses, users, and roles.
- Implemented controllers, DTOs, services, authentication/authorization, relationships, and business rules.
- Uses Docker and applies Clean Code, SOLID, DDD, and automated testing practices.

Bora Vender — WooCommerce-integrated POS PHP · Laravel · MySQL · WooCommerce · REST API GitHub

- Point-of-sale system built for a client, commercialized, and deployed in a real-world environment.
- Integrated WooCommerce with business rules and MySQL persistence; maintained and enhanced the system after deployment.

Auto Print Installer Python · PowerShell · Automation GitHub

- Printer installation/configuration automation tool developed in response to internal operational needs.

JSON Generator for Printers JSON · Configuration automation GitHub

- Utility for generating JSON data related to printer registration and configuration.

Omni Theme — Open-source contribution JetBrains IDEs · Java · Gradle GitHub

- Contribution through a fork of an open-source theme for JetBrains IDEs, including Rider, IntelliJ IDEA, and other IDEs.

TECHNICAL SKILLS

Backend: C#, .NET, ASP.NET Core, PHP, Laravel, Python, REST APIs, Object-Oriented Programming
Databases: PostgreSQL, MySQL, SQL Server, SQL, Entity Framework Core
Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
Tools: Git, GitHub, Docker, Docker Compose, Linux, PowerShell, Maven, XML
Practices: Clean Architecture, Clean Code, SOLID, MVC, DDD, automated testing

EDUCATION

B.Sc. in Computer Science — Universidade Nove de Julho (UNINOVE) | 2022–2026 (completed)
